INTERMEDIATE-K FRA MAURO BASALT

1.2.10.4 Ca-Fe-Mg composition of pyroxenes, and Fe-Mg composition of olivines in LKFM and IKFM samples. In addition to data collected for this study, data from the following studies are included: 14310: Brown *et al.* (1972), Crawford and Hollister (1974), Kushiro *et al.* (1972), and Ridley *et al.* (1972); 14276: Gancarz *et al.* (1972); 60315: Bence *et al.* (1973), Hodges and Kushiro (1973), and Walker *et al.* (1973); 60335: Walker *et al.* (1973); 62235: Crawford and Hollister (1974); 62295: Walker *et al.* (1973); 65015: Albee *et al.* (1973). Note that the use of various symbols denotes textural differences within poikilitic samples; among the IKFM samples, differing symbols are used for analyses from this study (circles) and analyses (triangles) from Steele *et al.* (1972).
